

Name _____

Name: _____

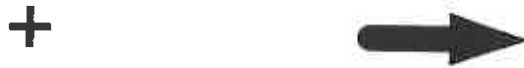

Directions:

1. Look at the chemical equation below.
2. Glue as many atoms/molecules below each part of the equation as you need to balance out each side.
3. Then add coefficients to represent how many of each atom/molecule you have for each chunk of stuff.

EQUATION:

PICTURE:

Name _____

Directions:

1. Color each Mg atom below purple.
2. Color each O atom blue.
3. Cut along the dotted lines to cut them apart.
